

### Improved Swiss Made Abrasive:

- ▶ For highest quality requirements
- ▶ Machine friendly and smooth operation
- ▶ Improved lifetime of up to 350'000 running meters

# 3708 siapan

Unlock excellence and improve your overall sanding efficiency with our further improved best-in-class combination series

## For ultimate sanding efficiency

### ► Premium Polyester-Paper Combination Backing

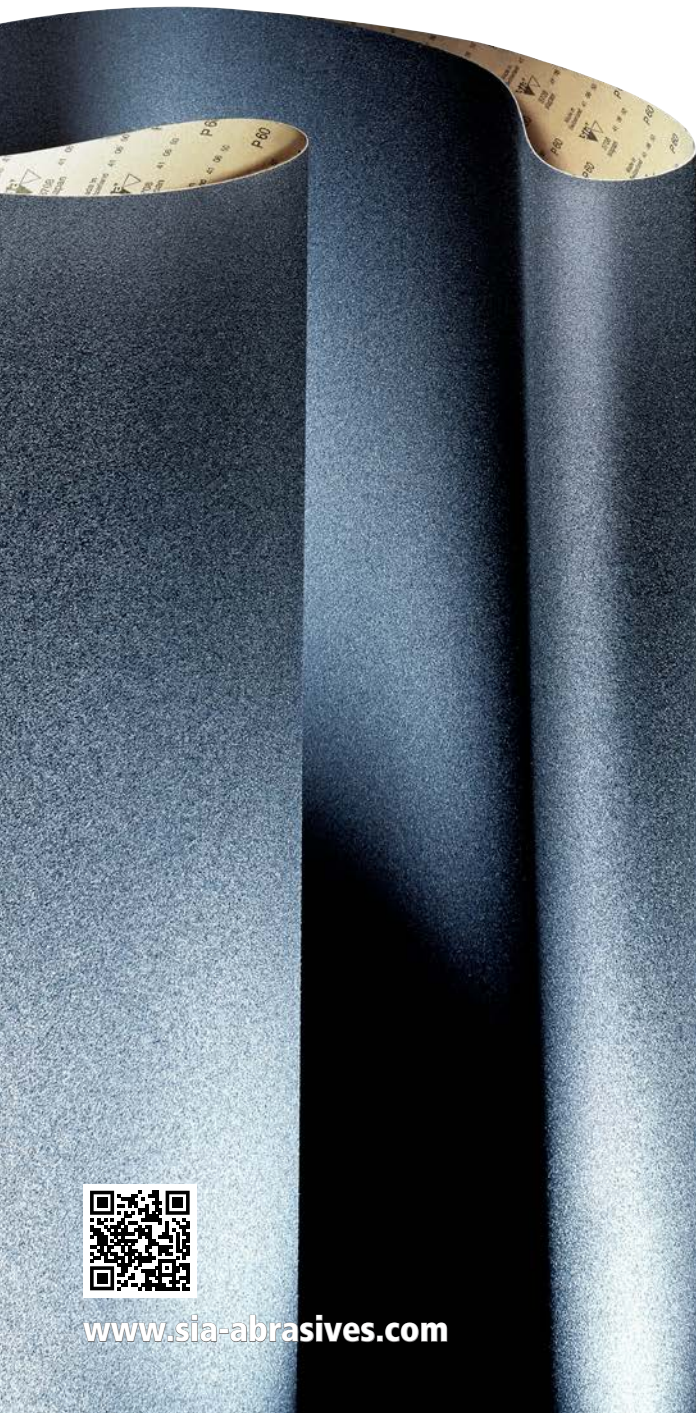

Reach high removal rates over longer operation time, optimize your surface quality and reduce overall belt consumption

### ► Revolutionary Enhanced Coating

Discover our superior coating technology for a flawless, consistent sanding finish and extended low grain breakout

### ► Excellent Belt Performance

To ensure uninterrupted operation, our industry-leading joints guarantee smooth, chatter mark-free surface quality as well as less machine down time caused by belt tears

## Distinctive features of our solutions

### Improved Productivity

Requires less machine adjustments, shorter running-in time and less belt changes

### Premium Materials

Crafted from top-quality materials, our products ensure durability, reliability and consistent performance

### Perfect Surface

Achieve perfectly smooth surface during the complete belt life time – not only at the beginning

**Reduce your sanding cost by up to 25 %**

**We will support you!**

#### Product profile

<b>Grit type</b>	Silicon carbide	<b>Backing</b>	Paper / cloth combination
<b>Grit range</b>	P036 – P150	<b>Open:</b>	P036 – P100
<b>Coating</b>	Electrostatic	<b>Closed:</b>	P120 – P150
<b>Bonding</b>	Resin over resin	<b>Technology</b>	TopTec
