

8933 siagrind

Highly efficient, hard grinding discs for iron and steel

Highly efficient, hard grinding discs for iron and steel

The hard grinding discs of the special 8933 siagrind series excel in a variety of metal applications and make for robust and efficient tools thanks to features such as high removal rates at low surface pressure and long life.

- ▶ Aggressive cut
- ▶ High performance for stock removal
- ▶ Long lifetime
- ▶ Comfortable to use with little contact pressure

Product profile

Grit type: Aluminium oxide
Bonding: Resin over resin
Glass fibre

Applications

- Welded seam preparation
- Removal of fillet welds
- Removing solid material
- Deburring

Materials

steel; Unalloyed / low-alloy steel; Ferrous metal

Technology

X-LOCK

Use
