Introducing... 5999 siafilm

For Automotive, Composites, Aerospace and Marine applications

The latest addition from sia Abrasives (GB) to complete the full sanding range for D.A. machine sanding, **5999 siafilm** discs are the final compliment to the paper abrasive range, 1950 siaspeed and and the siaair velvet range. Designed for the Automotive Refinish market, extensive tests on the new discs have shown very successful results.

Compatible with siaair velvet discs to achieve high quality finish prior to polishing process

Part Numbers:

Grit	125mm	150mm
P800	0002.1190	0002.1180
P1000	0002.1191	0002.1181
P1200	0002.1192	0002.1182
P1500	0002.1193	0002.1183

Product available in: 150mm 7 hole siafast discs & 125mm 9 hole siafast discs

P800 - Blending panels prior to lacquer process

P1000 - Blending panels prior to lacquer process

P1200 - Removing paint runs, heavy dust inclusions and orange peel prior to Polishing

P1500 - Removing light dust inclusions and orange peel prior to Polishing

Features & Benefits

- ☑ Heat treated Aluminium Oxide grit for durability and life
- ☑ Polyester Film Backing
- ☑ Stearate coating to prevent clogging and to produce superior performance and life
- ☑ Film Backing is resistant to tearing and folding – ideal for corners, edges and contours
- ☑ High tech bonding technology prevents grit shredding to achieve consistent scratch patterns and quality finish
- ☑ Extended life and durability achieved due to latest bonding technology
- ☑ In fine grits 800 – 1500 a Polyester Film backing gives a uniformly even surface for consistent performance. (Prevents random and deep scratches)

siafilm - Enhancing success with better surface results

Introducing... 5999 siafilm

For Industry - Paint and lacquer applications

On an industrial level, the new **5999 siafilm** disc enables us to compete in a market that, until now, was dominated by our competitors. With the new siafilm products we now have the capability to offer our customers a full process sequence up to and including the burnishing / final polishing stages.

When tested on pre-prepared work pieces siafilm is as good - if not better - in terms of life, against a major competitors' product!
